Create a Meeting Story Tree

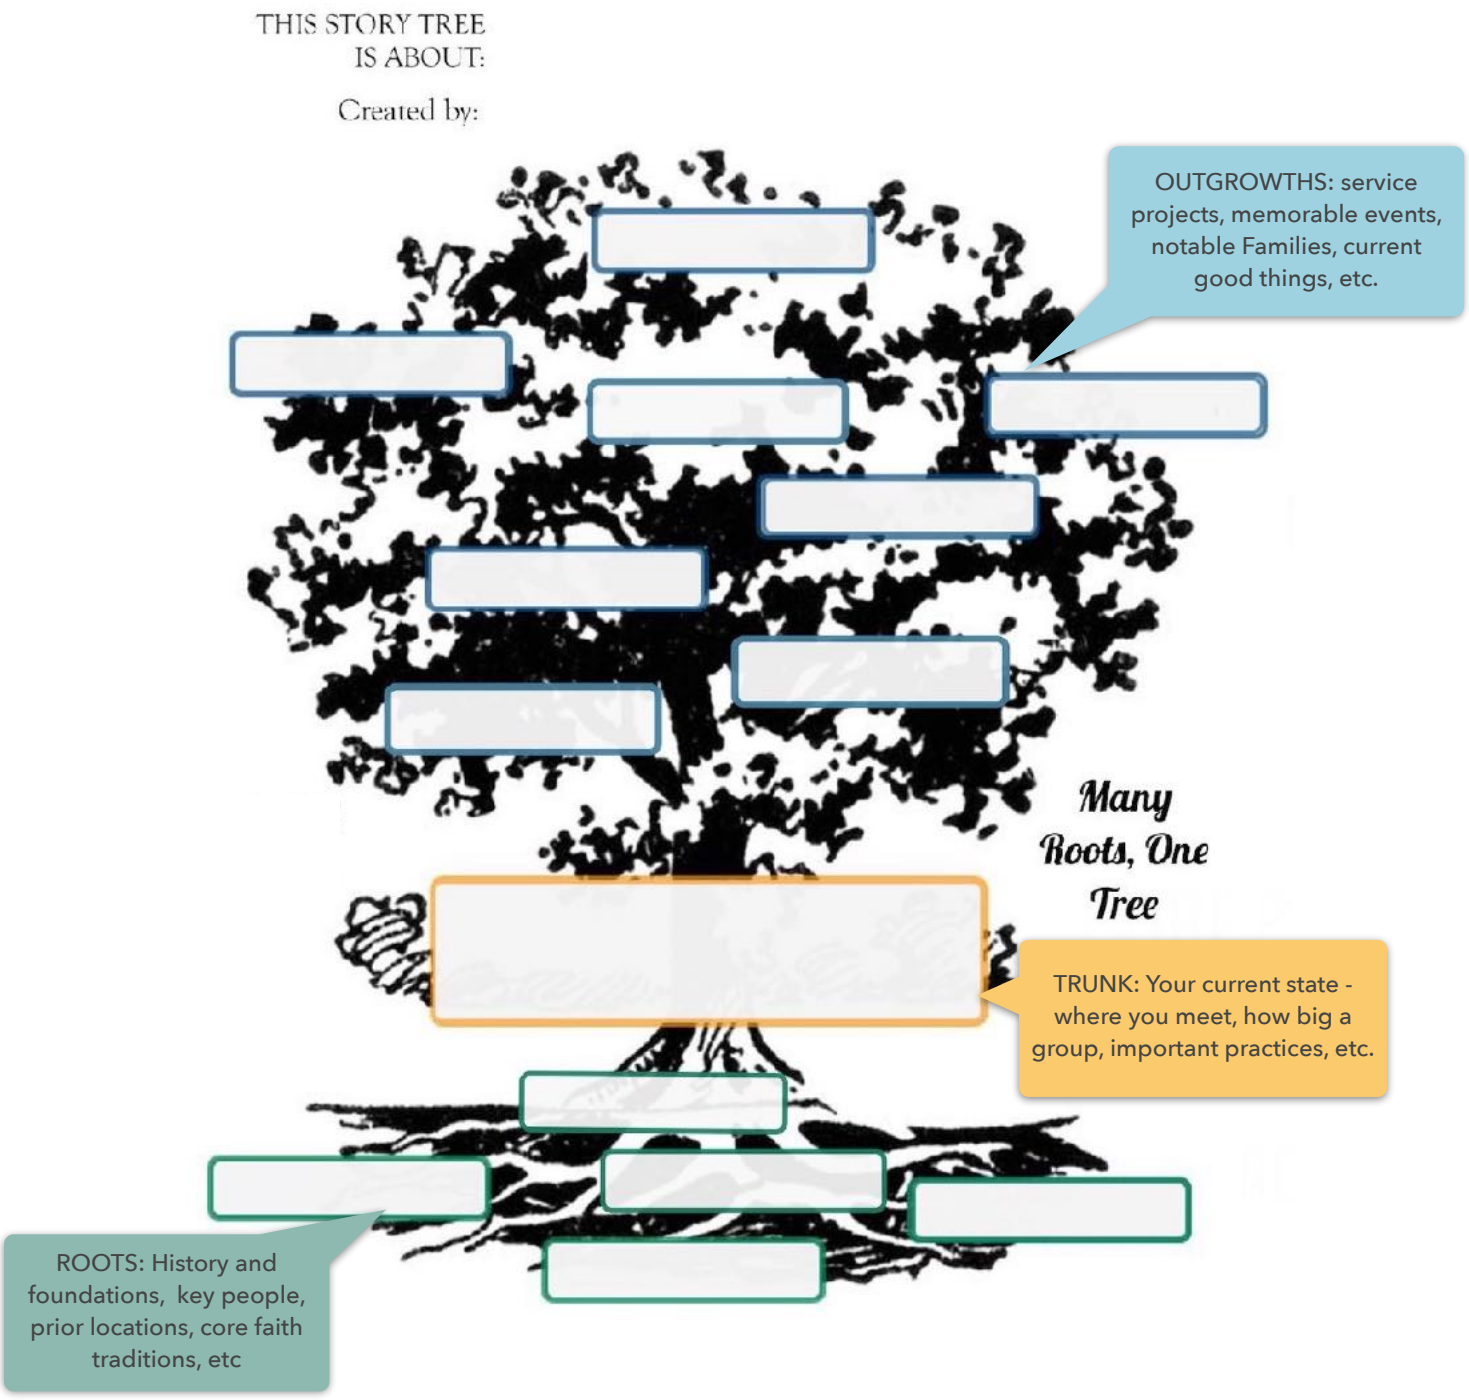

Many Roots, One Tree

Create a Visual Introduction to Your Group

Yearly Meeting Friends are being invited to do a quick visual introduction of their Monthly Meeting or Worship Group during our Opening Gathering. We are suggesting Friends use an annotated "Story Tree" as a quick way to highlight a few things about your unique Meeting for Worship.

We have created a template that can be used by a group of Friends to share some of the **roots** of your Meeting (early history, foundational people, etc.); it's **trunk** (current gathering location, size, practices, etc.), and some of the unique **out-growths** (leaves or fruits or even nuts!) nurtured in the Meeting over the years. We imagine that a group of Friends could gather via Zoom or in-person, perhaps after the rise of meeting, and together annotate a Story Tree providing some meeting history and special details. Digital representations of your tree (photos, files, or video) may also be provided.

We have provided a template below with fields that can actually be typed into. You could share it during a Zoom meeting and fill it out with help from your group. Just remember to save the updated file!

Note: *If you are feeling creative, you can try creating your own unique tree on some newsprint or in a Zoom Whiteboard or with construction paper, or whatever, and then take a screenshot or photo of your final Story Tree*

THIS STORY TREE IS ABOUT:

Created by:

This Story Tree template has **fillable fields** that can be typed in (and then saved!).
